Contact Email/Phone Number: 250-832-2188

Tell us about your Healthy Schools Team (i.e. who was on it? How many students? Other teachers? Partners?):

___We have 5 students and thus far no other teachers. Students that entered and did not win also have been helping contributing ideas.

Share Your School Story! Tell us about what happened and how it went!

We are in the process of coordinating with maintenance as to where to place fruit trees that the students wish to plant around the two campuses. So far we are waiting to find out the best places to put the trees.

We are also exploring ideas to have healthy barbeque as a welcome back for students at the beginning of next year.

The Jackson campus is currently expanding as we are creating a cafeteria and courtyard promoting student community. With this we are also exploring ideas about creating an indigenous garden to enhance this learning environment.

Nevertheless, all of this is contingent on placement of teachers in the next school year.

Reflections (what worked well, what would you do differently next year?)

The bureaucratic system is taking longer than expected. We might start with a smaller project next year rather than planting trees, like putting out a healthy lunch for students once a week.

Students have been very excitement around the project to improve the school grounds. However we have to wait till next school year to have permission to complete our project.
